Asteroid

Earth.
The near future - 2059.
A new drive has been discovered that enables very fast interstellar travel.
It's already the 16th asteroid in recent times!
The threat to life on Earth is becoming real!

Conference of scientists on threats to Earth
?!# #
Let's destroy the asteroid!
Let's look for a New Earth!!!
Japan
USA
Australia
Poland, Piwnice near Torun
I know now!
I will use the data from the radio telescope and analyze it using THE EAGLE Supercomputer at PSNC.

Poland, Poznan Supercomputing and Networking Center (PSNC)
The EAGLE Supercomputer is running at full speed.
Hurraaayy! We have found a new land suitable for settlement! Our new home!
A planetary system near Proxima Centauri
The first reconnaissance mission
We will set up the first colony
See you on New Earth

Project Superheroes 4 Science is supported by the Visegrad Fund – www.visegradfund.org.
Inspired by real academic research related to modelling observations of stars performed by researchers of the Center for Astronomy at Nicolaus Copernicus University in Torun, Poland in collaboration with Poznan Supercomputing and Networking Center (PSNC).
